RORY MACGREGOR

Full-Stack React/TypeScript/Node.js, experience in GIS

DETAILS

Edinburgh, Scotland

RoryMacGregorDev@outlook.com

07432 23 99 75

PROFILE

I'm a 34-year-old full-stack React/TypeScript/Node.js developer, who has spent the last 4 years working for an aerospace company in Edinburgh, specialising in satellite data visualisation within mapping applications.

EMPLOYMENT HISTORY

React Developer, Astrosat, Edinburgh

JULY 2019 — PRESENT

My primary role was to design, build and maintain the company's applications, as well as code and UI testing, utilising React/JavaScript/TDD best practices and design patterns.

This also involved leading teams of up to three developers, designing high-level solutions, delegating assignments and taking part in discussions with business and design team members within the company.

SKILLS

React	JavaScript
TypeScript	Node.js
Next.js	Redux
React Query	DeckGL
Material UI	Tailwind CSS
Jest	React Testing Library
Storybook	MongoDb
PostgreSQL	Linux
Jira	Agile Methodologies
Git	Github

SOFTWARE EDUCATION

SCQF Level 8 Professional Software Development, CodeClan, Edinburgh

FEBRUARY 2019 — MAY 2023

BA (Hons) Music and Audio Engineering, University of the Highlands and Islands, Perth

SEPTEMBER 2010 — MAY 2014

HOBBIES

Software is actually my primary interest. I'm always either developing an application or reading something about about my principal technologies or development in general. I've built many personal projects for learning, experience and sometimes just for fun, some of which can be seen on my portfolio site.

Other than that, I still do a lot of audio engineering, and I've been a musician for over 20 years, mainly acoustic and electric guitars, and performing in a successful wedding band before moving to Edinburgh. Since lockdown 2020, I've taken an interest in videography too.

Also a lifelong cyclist and a hobbyist speed-cuber (28 seconds PR)!
